DETAILED ACTION

This application is a continuation of U.S. Application Serial Number PCT/IB02/04240.

Claims 1-30 have been canceled.

New claims 37 and 38 have been added.

Claims 31-38 are currently pending.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 8, 2008 has been entered.

Claim Objections

2. Claims 37 and 38 are objected to because of the following informalities: the claims are dependent upon canceled claims 1 and 2. In the interest of compact prosecution, claims 37 and 38 are being treated as being dependent upon claims 31 and 32 as the base claim.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 31-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 31 is ambiguous and unclear in the recitation of a fragment of SEQ ID NO: 1 "that is at least 50% identical to the amino acid sequence of SEQ ID NO: 1.

Claim 32 is ambiguous and unclear in the recitation of a fragment of SEQ ID NO: 2 "that is at least 50% identical to the amino acid sequence of SEQ ID NO: 2.

Art Unit: 1644

A peptide cannot be a fragment of a larger protein or polypeptide and share only 50% identity with the sequence of the larger entity. As a fragment, the peptide inherently must possess 100% identity with a segment of the larger entity. Applicant must clarify what is being claimed. Is the claimed fragment at least 50% of the length of SEQ ID NO: 1 or 2? Alternatively, is the claimed peptide one that shares at least 50% identity with a fragment of SEQ ID NO: 1 or 2?

Conclusion

4. No claim is allowed.
